DDS&T
CAREER DEVELOPMENT COURSE
PROGRAM SUMMARY

I. The DDS&T in the Agency

STAT
STAT

This block deals with DDS&T management, mission and functions, objectives, and organization. It includes overviews of the Offices comprising the Directorate and addresses the major issues of concern to the Directorate and/or Agency. These CDC orientation and motivation sessions are conducted []

[] Discussion leaders will include the Deputy Director for Science and Technology, various Staff Chiefs, and S&T Office Directors.

II. National Intelligence Oversight, Control, and Coordination

This block is designed to place in perspective the governmental activities, agencies, and processes involved in establishing, maintaining, controlling, and coordinating U.S. intelligence activities. Presentations will address these aspects as well as the organizational structure, functions, and interfaces of the NSC and its Committees, NITC, Budget and Evaluation Staff, DCI Staff, Congressional Oversight Committees, NIO's, OMB, and State Department. Discussions will, where appropriate, address both U.S. and foreign intelligence relationships.

III. The National Intelligence Process

This block addresses all major aspects of the intelligence process with emphasis on Agency and particularly DDS&T functions. The major aspects covered include: Collection, Requirements, Processing, Production, User Needs and Intelligence Product Use, Research and Development, and Support activities. Sub-elements of this block will address each Agency Directorate and appropriate Office responsibilities, organizational structure, functions, processes or procedures, products and interfaces. The various intelligence community committees and staffs involved in the intelligence process from initial R&D requirements through intelligence report production will be addressed.

Administrative - Internal Use Only

~~Administrative - Internal Use Only~~

Collection system development and operation will also be addressed and special support activities/bases will be visited. User organizations and relationships will be covered and subjects are designed to familiarize the student with the varied applications of intelligence products. Emphasis will be on the interrelationships involved in the intelligence production process.

IV. S&T Related Fields

This block addresses areas not part of the intelligence process but related to DDS&T interests. It is flexible and may include brief sub-elements on "the scientific community" (Academy of Science, etc.), NASA, ERDA and S&T related industry. Emphasis will be placed on the interaction of these areas with and within government and, where appropriate, the specific relationships with the S&T intelligence process.
